**REPORT CARD**

**Vaccination Program**

- Up to Date
- Vac. Due: DA<sub>2</sub>PPV \_\_\_\_\_ Rabies \_\_\_\_\_ FVRCP \_\_\_\_\_ Leukemia \_\_\_\_\_
- Vac. Given: DA<sub>2</sub>PPV \_\_\_\_\_ Rabies \_\_\_\_\_ FVRCP \_\_\_\_\_ Leukemia \_\_\_\_\_

**1. Coat & Skin**

- Appears normal
- Dull / Dry
- Scabs
- Hotspot
- Itchy
- Shedding
- Matted
- Tumors
- Bacterial Infection
- Fleas (M, Mo, S)
- Hair Loss
- Pigment

**2. Eyes**

- Appears normal
- Discharge: L\_\_\_\_ R\_\_\_\_
- Inflamed: L\_\_\_\_ R\_\_\_\_
- Eyelid Deformities
- Infection: L\_\_\_\_ R\_\_\_\_
- Cataract: L\_\_\_\_ R\_\_\_\_
- Lenticular Sclerosis
- Other \_\_\_\_\_

**3. Ears**

- Appears normal
- Inflamed
- Itchy
- Mites
- Tumor: L\_\_\_\_ R\_\_\_\_
- Excessive Hair
- Yeast Infect: L\_\_\_\_ R\_\_\_\_
- Bacterial Infect: L\_\_\_\_ R\_\_\_\_

**4. Nose & Throat**

- Appears normal
- Nasal Discharge
- Inflamed Throat
- Inflamed Tonsils
- Enlarged Lymph Glands
- Other \_\_\_\_\_

**5. Legs & Paws**

- Appears normal
- Lameness (LF, RF, LR, RR)
- Damaged Ligaments
- Nails Too Long
- Joint Problems
- Foot/Hair Discoloration

**6. Mouth, Teeth, Gums**

- Appears normal
- Broken Teeth
- Tartar Buildup
- Periodontal Disease
- Malocclusion
- Gingivitis (Inflamed Gum Tissue)
- Loose Teeth
- Tumors
- Retained Deciduous
- Other \_\_\_\_\_

**7. Heart**

- Appears normal
- Murmur
- Slow
- Fast
- Other \_\_\_\_\_

**8. Abdomen**

- Appears normal
- Enlarged Organs
- Fluid
- Abnormal Mass
- Tense/Painful
- Other \_\_\_\_\_

**9. Lungs**

- Appears normal
- Abnormal sound
- Coughing
- Congestion
- Breathing Difficulty
- Rapid Respiration
- Other \_\_\_\_\_

**10. Gastrointestinal System**

- Appears normal
- Excessive Gas
- Vomiting Problem
- Anorexia (appetite)
- Abnormal Feces
- Parasites
- Other \_\_\_\_\_

**11. Urogenital System**

- Appears normal
- Abnormal urination
- Genital discharge
- Abnormal testicles
- Recommend neutering
- Mammary tumors
- Anal sacs
- Enlarged prostate

**12. Weight: \_\_\_\_\_ lbs. (Previous)**

- Normal range
- Heavy by \_\_\_\_\_ lbs.
- Thin by \_\_\_\_\_ lbs.
- Other \_\_\_\_\_

**13. Diet**

- Excellent
- Good
- Vitamins needed
- Improvement necessary

**Dogs**

- Annual Heartworm Test
- Negative
- Positive
- Recommended

Heartworm Refill?

- Yes
- No

**Cats - Leukemia**

- Negative
- Positive
- Recommended

**Cats / Dogs**

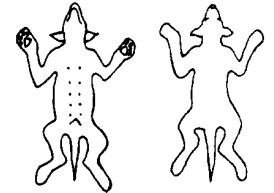

Annual Intestinal Worming

- Yes
- No
- Recommended

Result \_\_\_\_\_

**Dental Treatment Needed**

- Scale & Polish (Prophy)
- Periodontal Treatment
- Oral Surgery
- Extraction
- Other \_\_\_\_\_

**Diagnosis / Description**

(Numbers below correspond to numbers above)

- Lab results by phone / consult
- Injection given
- Start medication when:
- Give second dose medication when:

**Recommendations**

- Stay on heartworm pills year round
- Bathing recommended weekly / monthly / other
- See notes/instructions on printed invoice

**Need \_\_\_\_\_ in \_\_\_\_\_ days**

We recommend an annual comprehensive wellness physical exam and pre-surgical wellness exams prior to any procedures. The information we gather at each exam becomes part of the patient's medical history and can be critical if an emergency or sudden illness arises.

As part of an annual comprehensive wellness physical exam, we:

- ✓ Check for significant weight loss, which can be an early warning sign of disease. Obesity is a common problem for older pets. We will assess patient's diet and nutritional needs.
- ✓ Perform a rectal exam to check for abnormalities, if indicated.
- ✓ Assess the condition of legs, hips, joints, and spine.
- ✓ Assess the hair and coat. It should appear healthy and well groomed. Dull, dry, brittle hair or hair loss may indicate an underlying illness. Check skin for infection or signs of fleas, ticks or mites.
- ✓ Palpate the abdomen for abnormal masses or pain.
- ✓ Listen to the chest for heart murmurs, irregular heartbeat and abnormal lung sounds.
- ✓ Examine eyes for cataracts, glaucoma or inflammation.
- ✓ Examine ears for ear mites, infection or inflammation.
- ✓ Evaluate nose and nasal passages for signs of upper respiratory disease.
- ✓ Check for periodontal disease. As many as 95% of all pets two years and older have periodontal disease. We evaluate teeth, check the color and condition of the gums, bite evaluation, retained deciduous teeth (baby teeth).
- ✓ Palpate lymph nodes to check for inflammation or tumors.
- ✓ Check for heartworm and other parasites.
